MARHARYTA

FRONTEND DEVELOPER

KUBAI

PROFILE

I'm a frontend developer specializing in e-commerce and marketplace projects, with over 5 years of hands-on experience.

While my main background is in e-commerce, I'm also open to projects in other domains, as I'm interested in exploring new challenges and expanding my skill set.

My preferred stack is Vue and Nuxt, though I'm open to working with other tools and frameworks.

I have hands-on experience designing, implementing, and consuming APIs using Node.js, as well as building Electron-based applications and integrating Telegram and Discord bots.

Currently, I'm looking for a **Middle Frontend** Developer position. I'm ready for relocation and can consider a hybrid format, while **remote** work is preferable.

WORK EXPERIENCE

BPC | Remote

2021-06 - PRESENT

Frontend Developer

- Development and support of marketplace frontend features
- Implementation and maintenance of UI using Freemarker templates
- Improving and fixing responsive layouts across different devices
- Creating and maintaining production email templates
- Working with existing codebase and business-driven UI changes

ITSUA | Kharkiv

2020-05 - 2021-05

Junior Frontend Developer

- Development of a Vue-based application for Shopify
- Customization and maintenance of Shopify themes using Liquid
- Frontend integration within the Shopify ecosystem
- Supporting and extending existing e-commerce solutions

HOBBIES

- Developing Telegram and Discord bots for personal use and communities
- Building small automation tools and integrations using Node.js
- Creating personal desktop applications with Electron
- Experimenting with frontend tools and frameworks in pet projects
